Registered Name: Blacktie Prince Tamino

Call name: Tamino

Registration: PR020538/06

Date of birth: 2 March 2003

Date of death: 22 February 2011

Diagnosis detail: Progressive neurologic disease indicated by grand mal seizures, episodic whole body tremors, episodic jerking movements, loss of balance and hind limb ataxia/weakness. Organic causes ruled out by CSF tap and analysis, brain MRI and ACTH stim test. Tamino could not take most anti-seizure medications because of his IBD and seizures were increasing with use Zonisamide the drug with the fewest gastrointestinal side effects.
